- Project Management

Our Added Value

Unlike most of our competitors, we will include any residual value of the items we clear in our pricing. Therefore we are **more cost competitive** than other clearance companies. This also reinforces position as a premier Recycling Company.

What we do – the green way

MGH Group offer an environmentally friendly way to dispose of unwanted office furniture and equipment – with virtually nothing going to landfill.

Whatever you need cleared, call us and see how we can help you help and help the environment. We separate out the various waste streams in the items we clear, making recycling far easier and more efficient. Typically we can recycle 90 – 95% of the items we remove whether it is Furniture, Office Equipment, etc.

MGH Group offer a comprehensive IT recycling and IT disposal service in accordance with all UK and EU legislation (See our WEEE certification). Our service enables you to deliver on your corporate social responsibility objectives and, of course, all the legal requirements. Our IT disposal and IT recycling service is completely secure, highly cost effective, ethical and green.

On collection we issue you with a Waste Transfer Notice (WTN), which discharges the duty of care for the IT equipment from you on to us, the licensed waste carrier. We salvage material that can be reused before transferring the material to large facilities where redundant equipment is broken down into separate waste streams and recycled or otherwise treated.

We also offer a full data destruction service to MOD standards. We understand our clients' need for all data to be destroyed irrecoverably. We have several data wiping options, both on and off site. All options are fully certified and complete data destruction documentation is provided.

Where there is IT equipment that you believe might have residual value, we will make you an offer or advise on the sale to third parties. We have extensive contacts throughout the industry and will help you maximize the value.

Whether you need just a few items collected, or are upgrading a 500 person office, call **01236 452678** and discuss your IT recycling - IT disposal requirements with our helpful team.

The Complete Clearance and Recycling Service

We specialise in Clearance and Recycling. Whether you need a couple of items removed or hundreds of workstations disposed of, we can handle it. We make sure you fully comply with all the relevant legislation and that the job is done to the highest environmental standards, with minimal time, cost and inconvenience for you. Our data destruction service ensures that our clearance service is completely secure.

Our goal is to get the costs down, both to you and for the environment. We achieve this by recycling and reusing more than most of our competitors, meaning our clearance costs are often much less than theirs.

For larger office clearances we provide a dedicated project manager to oversee all the various aspects of the office clearance; from waste disposal, office cleaning, removals and storage, employee purchase initiatives, legislation compliance, to asset sales and valuations. Not only does this significantly free up your time, but it also enables us to achieve our objectives on time and on budget.

Talk to us today about your office clearance project.

Asset Purchase

Often there are items that can be resold. If you think you have some items that can be remarketed, we conduct a valuation. We can either make you an offer ourselves or assist in the sale to a third party. Our extensive contacts in the industry enable us to get you the best price.

We also offer an asset management service for all equipment removed.

Examples

- Some IT / telecommunications equipment
- Office furniture
- Catering equipment
- Surplus stock

Our rubbish clearance and waste disposal service is fast, effective and hassle free. Whether you need our stand-alone rubbish clearance/waste disposal service, or if it is part of a wide office clearance programme, we are the people to call.

Waste Disposal

All the waste cleared is recycled at the highest possible level. The waste disposal service complies with all current legislation and we supply you with all relevant documentation, including waste transfer notices. We can also ensure that confidential or sensitive waste, such as documents or branded items are destroyed.

Weee Recycling Accreditation

The 'Waste Electrical and Electronic Equipment (WEEE) Directive' became law in the UK in 2007. It covers the production, disposal and recycling of electrical equipment. It is designed to minimise the environmental impact of WEEE. As far as the waste management industry is concerned, this amounts to diverting as much as possible away from landfill through proper reuse and recycling initiatives, and ensuring that the remainder is separated from other categories of waste before being treated.

Electrical equipment contains some very toxic substances, such as lead, mercury and brominated flame-retardants so it needs to be dealt with responsibly.

Below is a list of the main WEEE Recycling categories:

- IT & telecommunication equipment
- Consumer equipment
- Lighting equipment
- Electrical & electronic tools
- Toys, leisure & sports equipment
- Automatic dispensers
- Household appliance

Our WEEE Offering

All waste in the categories covered by WEEE are transported and disposed of by our fully certificated operators in accordance with current regulations.

We are members of the major industry bodies and hold licenses from the Environment Agency covering waste treatment, waste transfer and the carriage of hazardous materials.

Our Certificates and Licenses can be viewed under the appropriate tab on the website
